EDUCATION & HONORS

University of Illinois Urbana-Champaign, Grainger College of Engineering, IL

Spring 2026

Double Degree: B.Sc. Industrial Engineering & B.Sc. Technology Entrepreneurship

GPA: 3.94/4.0

Honors: James Scholar; Dean's List; Tau Beta Pi; Outstanding Junior and Senior Award, ISE Department (600+ students)

PROFESSIONAL EXPERIENCE

Shiplight [AI software testing startup]

June 2026 - Present

Founding GTM Lead

- Drove GTM execution for Shiplight's self-serve launch, coordinating founders, engineering and partners across product positioning, demos, launch video, outreach materials and launch-day communications.
- Built a Python prospecting system that translated GitHub activity into research on 4,500+ developer profiles, creating a repeatable sourcing workflow for teams adopting AI coding tools.
- Ran persona-based LinkedIn outreach with a 35% message reply rate across nearly 400 conversations; developed targeted messaging and reusable playbooks for discovery, objection handling and follow-up.
- Built automated funnel reporting across GA4, PostHog and Google Search Console; corrected conversion and activation definitions to give founders a reliable view of acquisition, demo inquiries and product adoption.
- Designed a sales follow-up workflow that combined signup enrichment, company fit and product usage to prioritize self-serve users and tailor outreach to their stage of adoption.
- Built technical SEO and AI-search discovery infrastructure, automating indexing checks and turning content opportunities into a shared workflow with evidence, owners, priorities and follow-up.
- Executed targeted backlink campaigns and editorial partnerships; the team more than tripled referring domains (148 to 482) and increased Ahrefs Domain Rating from 5 to 30 between June and September.
- Built reusable content distribution and video production systems with Python and React/Remotion, repurposing blog content for developer communities and YouTube with publishing controls and performance tracking.
- Supported founder-led sales through customer discovery, inbound follow-up and technical presentations; translated engineering capabilities into buyer-facing materials and coordinated prospect conversations with the CTO.

Heymarket [B2B SaaS omnichannel business text messaging startup]

December 2025 - May 2026

Go-To-Market Engineer Intern

San Francisco, CA

- Built outbound workflows in Clay and Outreach to automate enrichment, segmentation and personalized messaging across priority customer groups, supporting the team's prospecting and qualification process.
- Developed lead scoring using firmographic, technographic and behavioral data to prioritize relevant accounts and give Sales a more structured approach to qualification.
- Ran A/B tests across messaging, channels and personas, incorporating feedback from Sales and Product to refine targeting, positioning and the outbound approach.

Innovo Markets [Fintech startup building infrastructure for energy commodities]

May 2025 - December 2025

Business Development Intern

Chicago, IL

- Built and optimized ZoomInfo-HubSpot workflows for lead enrichment, ICP segmentation and sales tracking; cleaned 500+ CRM accounts to improve data quality and prospecting.
- Developed targeted lead-generation and outbound workflows using AI tools and account research to build the prospect pipeline and support sales qualification.
- Initiated a company-university collaboration by connecting Innovo with UIUC's ISE department and bringing a company project into its senior capstone program.

Mag Mile Capital [Mortgage Banking Firm]

May 2024 - August 2024

Summer Analyst

Chicago, IL

- Applied financial models to support underwriting of \$70M+ in hospitality and multifamily real estate deals.
- Led project coordination for testing and implementation of AI-based underwriting software; built industry and lender research databases to support deal origination.

SKILLS

Development: Python, SQL, API integrations, Git/GitHub, React/Remotion, AI-assisted development, MCP tools

GTM Systems: CRM automation, data enrichment, lead scoring, segmentation, outbound sequencing, data pipelines

Analytics: GA4, PostHog, Google Search Console, funnel instrumentation, attribution, A/B testing

Commercial: Customer discovery, market research, outbound campaigns, partnerships, sales enablement, launches
